Thomas Kunz, Michiel F. H. Seuren

November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**

Publisher: IBM Press

Full text available: [pdf\(4.21 MB\)](#)Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial commun ...

2 [Zodiac: a history-based interactive video authoring system](#)

Tzi-cker Chiueh, Tulika Mitra, Anindya Neogi, Chuan-Kai Yang

September 1998 **Proceedings of the sixth ACM international conference on Multimedia**

Bettina Berendt, Myra Spiliopoulou

March 2000 **The VLDB Journal — The International Journal on Very Large Data Bases**, Volume 9 Issue 1

Publisher: Springer-Verlag New York, Inc.

Full text available: [pdf\(281.14 KB\)](#)Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

The analysis of web usage has mostly focused on sites composed of conventional static pages. However, huge amounts of information available in the web come from databases or other data collections and are presented to the users in the form of dynamically generated pages. The query interfaces of such sites allow the specification of many search criteria. Their generated results support navigation to pages of results combining cross-linked data from many sources. For the analysis of visitor naviga ...

4 A study of blind drawing practice: creating graphical information without the visual channel

Hesham M. Kamel, James A. Landay

November 2000 **Proceedings of the fourth international ACM conference on Assistive technologies**

Publisher: ACM Press

Full text available: pdf(3.56 MB) Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

Keywords: GUIs for blind users, contextual inquiry, feedback, grid, non-visual drawing tools

5 Teaching and learning as multimedia authoring: the classroom 2000 project

Gregory D. Abowd, Christopher G. Atkeson, Ami Feinstein, Cindy Hmelo, Rob Kooper, Sue Long, Nitin Sawhney, Mikiya Tani

February 1997 **Proceedings of the fourth ACM international conference on Multimedia**

Publisher: ACM Press

Full text available: pdf(1.56 MB) Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

Keywords: audio/video capture, educational technology, media integration, pen-based computing, ubiquitous computing

6 A 3D audio only interactive Web browser: using spatialization to convey hypermedia document structure

Stuart Goose, Carsten Möller

October 1999 **Proceedings of the seventh ACM international conference on Multimedia (Part 1)**

Publisher: ACM Press

Full text available: pdf(986.21 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Interactive audio browsers provide both sighted and visually impaired users with access to the WWW. In addition to the desktop PC, audio browsing technology can be deployed that enable users to browse the WWW using a telephone or while driving a car. This paper describes a new conceptual model of the HTML document structure and its mapping to a 3D audio space. Novel features are discussed that provide information such as: an audio structural survey of the HTML document; accurate positional ...

Keywords: 3D audio, WWW, browsing, document structure, hypertext, spatialization

7 Two-handed direct manipulation on the responsive workbench

Lawrence D. Cutler, Bernd Fröhlich, Pat Hanrahan

April 1997 **Proceedings of the 1997 symposium on Interactive 3D graphics SI3D '97**

Publisher: ACM Press

Full text available: pdf(1.04 MB) Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

8 The Satchel system architecture: mobile access to documents and services

Mike Flynn, David Pendlebury, Chris Jones, Marge Eldridge, Mik L  mning
December 2000 **Mobile Networks and Applications**, Volume 5 Issue 4

Publisher: Kluwer Academic Publishers

Full text available:  [pdf\(207.51 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Mobile professionals require access to documents and document‐related services, such as printing, wherever they may be. They may also wish to give documents to colleagues electronically, as easily as with paper, face‐to‐face, and with similar security characteristics. The Satchel system provides such capabilities in the form of a mobile browser, implemented on a device that professional people would be likely to carry anyway, such as a pager or mobile phone. Printing may be per ...

9 CavePainting: a fully immersive 3D artistic medium and interactive experience

 Daniel F. Keefe, Daniel Acevedo Feliz, Tomer Moscovich, David H. Laidlaw, Joseph J. LaViola
March 2001 **Proceedings of the 2001 symposium on Interactive 3D graphics**

Publisher: ACM Press

Full text available:  [pdf\(1.23 MB\)](#) Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

Keywords: 3D modeling, 3D painting, Cave, gestures, tangible user interface

10 Visualizing information spaces: Automatic graphical abstraction in intent-based 3D-illustrations

 Antonio Kr  ger
May 1998 **Proceedings of the working conference on Advanced visual interfaces**

Publisher: ACM Press

Full text available:  [pdf\(1.47 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

The purpose of this paper is to present models, methods and techniques to control automatically the degree of details in graphics or animation in an intelligent way. Instead of just aiming at the technical advantages of such a reduction (i.e. saving computer memory and computational load), this work focuses on clarifying the intention of graphics or animation with the means of abstraction. The goal is to direct the viewer's attention to relevant parts of the graphics, without using metaobjects o ...

11 Designing special-purpose input devices

 W. Bradford Paley
November 1998 **ACM SIGGRAPH Computer Graphics**, Volume 32 Issue 4

Publisher: ACM Press

Full text available:  [pdf\(941.66 KB\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

For an increasing number of applications, we may be reaching the point of diminishing returns with general purpose computer input devices, such as the keyboard and mouse. At Digital Image Design Incorporated (DID) we've created special purpose input devices to perform tasks that are commonly addressed with software and general purpose devices alone. These more specific devices have led to significant advantages in accomplishing the tasks, and we've developed an approach to designing these device ...

12 The challenges of 3D interaction: a CHI '94 workshop

 Kenneth P. Herndon, Andries van Dam, Michael Gleicher
October 1994 **ACM SIGCHI Bulletin**, Volume 26 Issue 4

Publisher: ACM Press

Full text available:  [pdf\(880.84 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

3D computer graphics is becoming more and more popular due to the increased availability of 3D hardware and software on all classes of computers. However, despite this growing popularity and the existence of a number of successful 3D graphics applications, particularly in CAD, CAE, and medical and scientific visualization, the field is still very immature. There are no widely accepted standards for hardware or software platforms; learning to implement or use 3D graphics software is still extreme ...

13 [Palette: a paper interface for giving presentations](#)

Les Nelson, Satoshi Ichimura, Elin Rønby Pedersen, Lia Adams

May 1999 **Proceedings of the SIGCHI conference on Human factors in computing systems: the CHI is the limit**

Publisher: ACM Press

Full text available:  [pdf\(1.11 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The Palette is a digital appliance designed for intuitive control of electronic slide shows. Current interfaces demand too much of our attention to permit effective computer use in situations where we can not give the technology our fullest concentration. The Palette uses index cards that are printed with slide content that is easily identified by both humans and computers. The presenter controls the presentation by directly manipulating the cards. The Palette design is based on our ...
